A supply chain risk management platform built to identify and continuously monitor supplier risk

Why partner with Supply Guard

Supply Guard is a NCSC-aligned supply chain risk management platform that you to identify, assess and continuously monitor the security posture of suppliers for your clients.

It delivers third-party risk management as a scalable, automated service by centralising supplier assessments, automating questionnaires, and continuously monitoring supplier risk, certifications and vulnerabilities. Supply Guard addresses the growing demand for supply chain assurance.

Challenges Supply Guard addresses

Supply chain security has become a critical concern for all businesses. Supply Guard replaces manual processes such as spreadsheets, email-based questionnaires and siloed risk tracking with a single automated platform for managing supplier risk.

- Automated workflows replace manual supplier onboarding, assessments and follow-ups
- Centralises supplier risk, certifications and communications in one platform
- Provides continuous monitoring of supplier security posture
- Surfaces high-risk suppliers in real time
- Replaces reactive processes with live alerts for breaches, expiring certifications and security changes

Opportunities for channel partners

Supply Guard enables partners to launch a new managed supply chain security service and strengthen customer relationships through continuous risk visibility and proactive remediation. It uncover security gaps that drive additional upsell opportunities and improves pre-sales conversations by identifying supplier risk in prospects early. This supports better protection of both customer environments and partners' own organisations through ongoing third-party risk monitoring.
